

Question 6

$$I_1 = \int 3x^2 dx$$

$$I_2 = \int \int x^2 y dx dy$$

I_1 v N

I_2 v N

$$I_1 \text{ v } T : (N = 20)$$

$I_1 \text{ v } T : (N = 1000)$

$$I_1 \text{ v } T : (N = 20)$$

$$I_1 \text{ v } T : (N = 20)$$

$$\sigma \propto N(T = 1000, I_1)$$

$$\sigma \sim N(T = 1000, I_2)$$

NOTE : σ is proportional to $\frac{1}{\sqrt{N}}$.
